# BlueBio4Future

THE STRATEGIC OBJECTIVE of Blue Biotechnology and Bioengineering for Current and Future Development of a Blue Bioeconomy in Portugal – BlueBio4Future – is to place CIIMAR at the forefront of Research, Development and Innovation (R&D&I) in the field of Bioengineering and Blue Biotechnology.

## Bioengineering ERA Chair

BlueBio4Future ERA Chair Concept and Approach

The ERA Chair holder will establish a high-performing team at CIIMAR, contributing to **increasing the knowledge, attractiveness, and competitiveness of CIIMAR** in the area of **Blue Biotechnology and Bioengineering**.

This will be done by **attracting funds at national and international level**, supporting post-graduate studies through the supervision of MSc and PhD students, producing high-quality research outputs, protecting intellectual property and transferring knowledge to stakeholders.

This will **contribute to increase literacy** in the broad subject areas of **Blue Biotechnology and Bioengineering**.
